

SYNKROS® Progressive Management™

AMP THE EXCITEMENT, AT THE TOUCH OF A DIAL.

SYNKROS® Progressive Management™ gives casinos the power to launch integrated, centralized progressive jackpots, with no additional in-game hardware, no additional network connections, required.

OVERVIEW

Casinos can create their own progressive jackpots to run on any SAS 6.0+ enabled game machines that are AFT capable on the casino floor with a new integrated technology called SYNKROS Progressive Management (SPM). SPM can be configured to run integrated progressive jackpots on any machine, bank of machines, casino zones, or even the entire gaming floor. Launch custom-configured, standard or mystery progressives to targeted player segments and machines of their choice, from within SYNKROS' integrated platform and without any additional in—machine hardware or networking.

Jackpot Progressive meters can be displayed in real-time via the True-Time Display™ SYNKROS player tracking screen; on the game screen via SYNKROS True-Time Windowing™ “picture-in-picture” technology; and/or on any casino in-house TV monitor via a SYNKROS sign kit. The sign-kits showcase all available jackpot levels running on the floor as well as display “must hit by” amounts, with full administrative sign management and sign maintenance within SYNKROS. SYNKROS Progressive Management offers a highly configurable and distinct player bonusing opportunity for casinos seeking a competitive edge or extra advantage.

AT-GAME DISPLAYS

In addition to SYNKROS sign kit displays, SYNKROS also supports real-time display of SPM at the game machine through the True-Time Display. Players can discover available awards and receive SPM win notifications through the game machine's center LCD player tracking display.

STANDARD PROGRESSIVES

Casino teams can leverage SPM for standard progressives, managed through traditional EGM pay table progressives. This includes support for linked progressives and floor wide progressive management. Wins are determined by each EGM.

MYSTERY PROGRESSIVES

With Mystery Progressives delivered by SPM, wins are randomly determined by the system. Each mystery bonus level can be configured exclusively to all players, carded players only or to a specific card tier. Mystery Progressive meters also include “must hit by” amounts.
