KNOCK OUT WINS

GAME PLAY

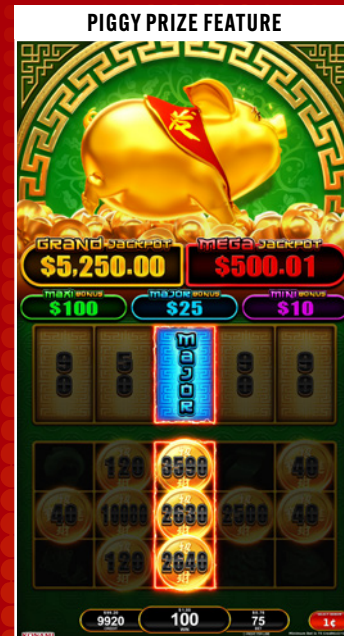

K-Pow! Pig has a standard 5-reel base game, with the chance to collect trigger Pig symbols across all 5 reels. Scatter Medallion symbols are available across the center reels, transporting players to the free game feature when any 3 are collected. In addition, the game’s big Grand jackpot can be awarded at random during primary play!

K-POW! PIG FEATURE

The game’s signature K-Pow! Pig feature can be awarded randomly with any 3 or more Pig trigger symbol that land, and it is guaranteed with any 6 or more trigger Pig symbols in a single spin. The event is an All Aboard-style credit collection feature across a 3x5 frame with 3 spins to start. Only blank spaces and prizes are displayed across 15 independent spinning reels, with prizes locked upon landing. Prizes include random credit awards and static Mini, Major, and Maxi bonus awards. The game’s standalone Mega jackpot progressive can also appear, though it is instantly awarded, and the coin is transformed to a random credit prize after the Mega is claimed. Any time a prize lands, the number of remaining spins resets to 3. If the entire 3x5 frame is filled with prizes during the K-Pow! Pig Feature, then the big Grand Jackpot is awarded.

PIGGY PRIZE FEATURE

If 3 credit prizes fill a reel strip during the K-Pow! Pig Feature, players are awarded a Piggy Prize upgrade with the chance to add more and more credits onto the displayed credit prize amounts. The Piggy Prize reel spins horizontally and is completely filled with a mix of random prize amounts. Players spin the Piggy Prize reel to determine the amount of the prize upgrade. Once an upgrade amount is claimed, it becomes a blank space and the player spins again for another upgrade. Players can even win standalone Maxi, Major, and Mini bonus amounts as upgrade prizes! The upgrades continue until the player lands on a blank space, at which time they resume the original credit collection feature with the upgraded credit prizes shown.
